Employment History

Web Developer | World Synergy
August 2019 – Present

As part of the Project team, I assist clients with web and application based projects ranging from WordPress, Magento, BigCommerce, SharePoint, custom app development and more. I am also responsible to assisting with the data integration between two or more softwares, utilizing third party integration platforms like Celigo. I support our clients daily by reviewing escalated, and high priority tickets. I attend weekly meetings to discuss issues we may be having as a team and how we can improve our processes as a whole. I am also responsible for scoping project hours, and proposing new and improved solutions.

Jr. Developer | World Synergy
Sept 2015 – August 2019

When joining the World Synergy Development team in 2015, my primary responsibilities were the review and completion of client support tickets. With more experience, I assisted my team with custom WordPress builds and grew my knowledge of eCommerce solutions and ERP softwares. Additionally, I became responsible for security management with softwares Securi and StatusCake.

Education

Case Western Reserve University
Full Stack Web Development Bootcamp
August 2019 – February 2020

Cuyahoga Community College
Associate Degree, Web & Interactive Media
May 2014 – 3.14 GPA

Ross Ritchey | Direct Manager at World Synergy
Owner and Principal Developer, Assisted Innovations

“I first met Sean at Cleveland GiveCamp. We worked together on a website project, and over the course of the weekend I recognized his outstanding work ethic and burgeoning skills. When I next had an opportunity to add another developer to my team, Sean was the first person that came to mind. He was so humble that he thought I was “giving him a shot.” The actuality of it couldn’t be more different. He earned his spot on the team, and became integral to every project that he worked on. Always looking to learn and grow, Sean picked up every challenge I threw his way with vigor and steadily grew in both skill and knowledge. Wanting to move faster; he sought out opportunities outside of work to keep growing. I cannot recommend him enough. He improves any team that he is on. Any company would be lucky to have Sean on the team.”

Alyssa McQuillen | Worked with at World Synergy
SEO/SEM, Digital Marketing at Davey Tree

“I had the pleasure of working with Sean for nearly 6 years on several website projects and applications. He played a significant role on every project. Clients were always pleased with his work and due diligence. He is passionate about his work and gives every project 110%. He also takes it upon himself to further his coding knowledge by completing additional courses to learn new techniques and to stay current in this ever-changing digital space. A few words that come to mind to describe Sean is self-driven, fast learner, easy to work with, thoughtful and considerate. I am confident in his technical skillset and he truly an asset to any web applications team.”

Chanel Williams | Volunteered with at Cleveland GiveCamp
User End Services at Sherwin Williams

“Sean is the type of developer that ANY company or project would tear down doors to meet. I had the pleasure of working with Sean at GiveCamp 2017, where Sean helped build a strong foundation for our project with awesome technical skill and troubleshooting. With determination and experience Sean tackled any problem that arised and solved it. I can’t speak enough to Sean’s patience, great attitude, and willingness to help others, he would be a great asset to any team.”
